Harmonia 22 with Small Flat Steel Front,
& Eternal Flame Reflective Ceramic Glass Panel Set

2 HARMONIA (Har-MO-nee-ah)

The immortal Greek goddess of harmony and concord.

Harmonia presided over both marital harmony and the harmonious action of soldiers in war. Harmonia is described as having a heart that is completely pure, without bad thoughts whatsoever.

Archgard's Harmonia 22 is the first of the Harmonia line and now available with Millivolt Ignition.

Named for the flames as they flicker and dance, the Harmonia 22 provides the ambiance to complete that natural gathering space for your friends and family, becoming the pure heart of your home.

People are drawn to the fire and captivated by its dance as they too find harmony, concord, and create memories that will last a lifetime.

The Harmonia 22 fireplace insert allows you to transform the smallest of openings and converts your old dirty and inefficient fireplace into the clean and efficient fireplace you've been seeking.

As shown:

Surround: 22-SKSBS (Surround Kit, Small, Black, Shallow)

Decorative Trim: 22-DTBC Brushed Copper

Panel Set Option: 22-BRPL-QCG

RADIANT HEAT VS CONVECTION HEAT

Radiant heat is the intentional transfer of radiant energy from your Archgard fireplace directly to objects and people within the room. Like the sun on a cool morning or sitting around a campfire, the surrounding temperature may be cool, but you are warm and comfortable because of the radiant heat that is transferred from the source directly to you.

Convection heat generates an air current to help heat the air in the room quicker and push heat out to fill even larger spaces. This process is improved by adding the optional efficient six speed heat distribution fan which is operated using your standard remote control.

Radiant heat is known to be more efficient than convection heat due to differences in the way each system heats your home.

The Harmonia 22 gives you the best of both heat types as all Archgard gas inserts are both radiant heaters AND convection heaters.

RADIANT HEAT

CONVECTION HEAT
